

IDEATE

Introduction

In a world where everything is going from 'macro' to 'micro' and technology defines the existence of human world, habitation without the previous one cannot be imagined. But in the meantime the even more greater asset available to the mankind is human brain which can no doubt be called the Father of Technology, and it is a crystal clear fact that technology and human brain can make wonder happen!

So friends this event is all about to make your temple horses run fast and come up with an efficient solution of problems present around the vicinity of yours or any other individual.

Event Progress

1. The participants have to present a model (working/non-working) to showcase your proposal for a certain problem.
2. A short presentation has to be prepared in order to demonstrate virtually that how the system developed is efficient in all fields whether it comes to application, cost, complexity etc.
3. There will be a Questions/Answers round for the team presenting their ideas related to technical or social aspects of their Idea.

Rules

1. A team can comprise up to three participants.
2. Two groups, Group A-comprising of 1st & 2nd year students and Group B- for 3rd & 4th year students will be in effect.
3. The time duration for each presentation will be 5 minutes.
4. The groups will be judged by respective faculty.

Certification

1. There will be some extra marks for the groups having both sexes in it.
2. The prize distribution will be on the basis of the judge's assessment.
No other means of scoring criteria used by teams will be accepted, only decision of judges will be final.
3. Top three teams will be awarded certificate of excellence and winning amounts.

Eligibility

Students with their Identity Cards of their respective colleges will be eligible to participate.

Coordinators-

1. Mradul Tiwari - 9419601211
